Initial if applicable

2024 SPRING OPENING SERVICE PROGRAM -- Page 2

Here's what ROYAL POOLS & SPAS, INC. will do to "WAKE UP YOUR POOL"

1. Remove the pool cover and stretch it out to dry in an area designated by you.

Cover Location : _____

If no location is designated we will fold the cover & leave it in/near the pool area.

2. Reconnect and check your filter, pump, piping and fittings.
3. Reconnect your ladder and hand rail.
4. Add initial shock/oxidizer to your Swimming Pool.
 - A. For pools on Baquacil ®: We will add 1 Gallon Baquacil Oxidizer™ for each 10,000 gallons of pool water.
 - B. For pools on CHLORINE, BROMINE, SALT, NATURE2™ or Oxygen: We will add Liquid Chlorine Shock.

Here's what you must do prior to the arrival of our Technician

1. Add fresh water to raise the level to at least mid-skimmer range, if this is not done, your equipment will not be operational upon our departure. **If this happens, we can return for a fee of \$175 to start your system.**
 - * **You can pre-schedule a return trip for \$100** if you anticipate low water level - See Front Page -
2. Remove all leaves, debris & water from the pool cover. If this is not done, we may have to re-schedule for a fee of \$170.00 for a later date or debris and cover water might inadvertently be deposited into your pool.
Royal Pools can remove the debris in advance of your opening at our normal service charge of \$185.00 for the first hour.
3. Make sure that the electrical connections (breakers) are turned on and accessible. Make sure an outside water source is on and available.
4. If your pool has a Gas Heater (LP), make sure there is gas in the tank.
5. Have a **Responsible Adult** present the day the pool is opened. We want to make sure that the job is done to everyone's satisfaction the first time.
6. After your pool is opened, circulate your water for at least 24 hours and then bring your water sample to any of our Water Care Centers, located in each of our locations, for a **Free Analysis.**

PROFESSIONAL POOL OPENING TIPS

Once all of the ice has melted from your pool cover, remove any leaves and/or debris that has accumulated on your cover. If there is water on your cover, remove the water leaving 2 or 3 inches to keep the cover weighed down. Then add 6 ounces of algaecide to the water on the cover and brush it to spread it through the water. You should also add a quart of algaecide under your cover at the same time.

Open your pool as early as possible. If you open later, algae will begin to grow and whatever savings you realized by not running your pump might then be needed to clear your pool.

We recommend opening between Mid-April and no later than Mid-May to reduce the chance of Algae growth. **We offer discounts for pools opened in April.** See the enclosed information.

It is never too early to schedule your pool opening. The dates fill up quickly, so scheduling early will help to ensure you get the week you are looking for.

Other Notes!!

If you have a ladder or drop in steps, we recommend that you install a rubber mat to protect your liner.

If your pool opens full of Algae, we will not install drop in steps (if any). Regular Service Charge applies if we return to re-install later (Less the cost paid to install them at opening.)

*Spring Pool Cleaning - Depending on the way your pool opens, it might take more than 1 visit to get the pool in usable condition. We can't tell you how many trips until we see the pool condition. For a pool cleaning, the water level should be to the top of the skimmer

This service is in no way is meant to be a safety check or safety audit. We are not responsible for the safety of your pool, equipment, or appurtenances. At the start of each season, you should have a licensed electrician inspect the electric to ensure that it meets code and is safe. You should also have your insurance carrier perform an annual audit to ensure that your pool area, fence, patio, landscaping, all meet or exceed code. There is no level of service that we offer that is meant to ensure the safety of your swimming pool or spa. It is the owners sole responsibility to do so.
